LASER EXHAUST SYSTEMS BY JAMA ENGINEERING BV

RACING EXPERIENCE...

RACING BRED

The racetrack is the ultimate testing ground. New concepts, designs and materials are put to the test by the worlds leading race teams at all levels of competition.

The shape and construction of the LASER HotCam Dual Sound and the LASER Duo-Tech are directly derived from the racetrack.

...FOR STREET USE

DUAL SOUND TECHNOLOGY

The LASER HotCam Dual Sound and Duo-Tech mufflers offer the possibility to choose between two sound levels. Through the use of LASER's revolutionary Dual Sound concept, your exhaust can be transformed from homologated to supersport in minutes...and vice versa. This concept is based on exchangeable inserts. These stainless steel inserts have their own specific effect on the sound level of the exhaust. Optimum performance is guaranteed in any configuration.

HOTCAM DS

The LASER HotCam Dual Sound is the No.1 performance exhaust! The direct result from many years of racing experience. The racing technology is translated into street use with this lightweight muffler. Maximum ground clearance and a real "deeptone sound" is achieved thanks to the unique "cam" shaped design.

- HOMOLOGATED & SPORTS IN ONE SYSTEM
- LIGHT WEIGHT
- UNIQUE DESIGN
- MAXIMUM PERFORMANCE
- MAXIMUM GROUND CLEARANCE
- HANDMADE TOP-QUALITY

DUO-TECH

Technical innovation is of great importance for LASER. Therefore LASER has designed the LASER Duo-Tech in order to create the perfect combination of performance increase, flexibility of sound and a highly durable construction.

Whether it is on the street or on the track, the oval shaped LASER Duo-Tech can handle every situation.

This exhaust system is available for a wide range of motorcycles. With the Titanium, Carbonfibre or Stainless Steel outer sleeve, the LASER Duo-Tech looks sublime on every motorcycle.

- HOMOLOGATED & SPORTS IN ONE SYSTEM
- HIGHLY DURABLE
- STYLISH DESIGN
- PERFORMANCE INCREASE
- HANDMADE TOP-QUALITY
