DEEPTONE EXHAUST SYSTEMS

MADE BY
JAMA

- EASY FITMENT
- FREE DB-KILLER(S)
- ULTRA LOW WEIGHT
- HANDMADE QUALITY
- BETTER PERFORMANCE
- UNIQUE DEEPTONE SOUND

LASER OVAL EXHAUST SYSTEMS

• FOR MORE POWER AND THE REAL DEEPTONE SOUND!

Available for many types of bikes: the LASER Oval muffler!

Crafted from the best materials available, such as Titanium, Stainless Steel and Carbon Fibre. The LASER "handmade quality" assures perfect fitment and the biggest power increase possible. Designed for performance they give more power and the famous deeptone sound.

The free dB-killer lets you choose the noise level. No rejetting required.

ROTATION FLOW SYSTEM

INSIDE

The helicoical louvred baffles provide a real turbine-effect, creating a radically reduced backpressure. This results in more power and increased torque. The louvre pipe is completely finished, even on the inside.
